

Every year about 160 thousand people in Ukraine have oncology diseases and about 100 thousand die. These figures were reported on 17 March 2004 during the Parliament session on 'Oncology Diseases in Ukraine'. The following are the regions with the highest number of people having cancer: the Crimea, Odesa, Kherson, Mykolayiv, Kirovograd, Poltava, Kyiv.

Morbidity is the most precise indicator of environmental influence on the human. However the static figures are not always accurate and comparable. Mortality can be viewed as the consequence of the environmental influence. This indicator is the subject to obligatory registration under a unified classification of causes of death. Officially morbidity and mortality are calculated yearly per 100,000 of population.

GLOBALIZATION ISSUES

*Matti Fatui Olaribigbe,
Babalola Lookman Ajibade,
Nigeria*

Globalization is the process of increasing the connectivity and interdependence of the world's markets and businesses. This process has speeded up dramatically in the last two decades as technological advances make it easier for people to travel, communicate, and do business internationally.

Two major recent driving forces are advances in telecommunications infrastructure and the rise of the internet. In general, as economies become more connected to other economies, they have increased opportunity but also increased competition. Thus, as globalization becomes a more and more common feature of world economics, powerful pro-globalization and anti-globalization lobbies have arisen. The pro-globalization lobby argues that globalization brings about much increased opportunities for almost everyone, and increased competition is a good thing since it makes agents of production more efficient.

The world as its often refer to as a global village shows that the whole world has been made to be as a village with the aid of globalization. Globalization has drastically improved all aspect of human life such as Education , Social, Economy, Environment etc. The importance of globalization can not be over emphasized due to the unlimited improvement it has brought to life as a whole.
