THE IMPACT OF THE ZODIAC SIGN AND PSYCHOTYPE ON CHARACTER AND HUMAN DESTINY

Kostornova S. A., *student*; SSU, gr. MK-51

Modern science has exposed most of the secrets of our world. Either way even humans were subjected to detailed investigation. We are distributed in temperament, Horoscope and many other things. To some an extend, even our name affect our character and our destiny.

Astrology is a science into which believe not everyone. But whether can you really tie the zodiac sign to the character's personality? According to a recent study published in the journal *Comprehensive Psychology*, our date of birth may actually influence our personality traits, such as being introverted or extroverted. But if we consider the identity of the person in greater depth astrology is in this mass can only rarely get to the point. In most cases character traits correspond to the sign. On the other hand, pseudo-science that predicts the future of the human by the stars is not the most truthful. Maybe that does not a star, but a combination of other factors resulting in strikingly truthful predictions. For example Mark Hamilton, study author and a social scientist in the Communication Department at UConn conducted similar research.

Also it considered that the temperament carries a high impact on the activities and behavior. In contrast to the study of horoscopes difference human temperaments based on scientific research. There are specific tests that distribute the human on the choleric, melancholic, phlegmatic and sanguine. Each of these types has certain qualities. You can find an approach to man and make his life more comfortable based on these qualities. Knowledge of specific psychological traits can actually greatly simplify the understanding of human nature. But the identity of each of us is arranged not according to a certain pattern so that in order to unravel the man you need certain skills and a lot of time.

That's why for the entire world man is still a mystery. As always there will be people who are born under a "different" sign of the zodiac. Some people such as Billy Milligan generally combine multiple personalities. That's why we must remember that we will be able to find ourselves only if we listen to ourselves and not some horoscopes or tests.
